SUMMARY

Software Engineer with 4+ years of experience designing and delivering full-stack web and mobile platforms across e-learning, ERP, healthcare, and e-commerce. Hands-on in system design – scalable backend architecture, data modeling, API design, and caching strategies – using Next.js, NestJS, PostgreSQL, MongoDB, and Redis, deployed on AWS with Docker and CI/CD. Led end-to-end development of a live LMS and a multi-vendor marketplace from architecture to production, reducing API response times by 35% and initial page load time by 40%, and currently integrating LLM-powered features into a global ed-tech product.

EXPERIENCE

Software Engineer

Bina

Jan 2026 – Present

Ra'anana, Israel (Remote)

Development and maintenance of full-stack applications for a global tech education platform. Achieved **35% faster API response times** through query profiling, indexing, and Redis caching. Integration of AI-powered solutions (OpenAI API, LLMs) and contribution to scalable product development in a distributed team.

Backend Instructor

Hablu Programmer

Apr 2025 – Dec 2025

Rajshahi, Bangladesh (Remote)

Delivered backend training on REST APIs, databases, authentication, and scalable architecture using Node.js, Express.js, and MongoDB. Mentored **200+ developers** on APIs, databases, system design, and clean code through hands-on projects and code reviews.

Software Engineer

E-bitans Limited

Jan 2024 – Feb 2025

Dhaka, Bangladesh (On-site)

Development and maintenance of enterprise web applications, including ERP and inventory management systems. Designed scalable backend services across the full stack and optimized code structure and database queries to improve platform efficiency.

Front-End Engineer

Lara Group

Sept 2022 – Dec 2023

Nairobi, Kenya (Remote)

Development of responsive web applications using React.js and Next.js for fintech and e-commerce clients. Delivered **40% faster initial page load** through Next.js SSR/SSG, bundle optimization, and code splitting while collaborating with cross-functional remote teams in an agile workflow.

Databases & Caching: PostgreSQL, MongoDB, Redis

Architecture & System Design: REST & GraphQL API Design, Modular Monolith, Microservices, Event-Driven Architecture, Web-Sockets (Socket.io)

AI Integration: OpenAI API, Claude API, OpenRouter, LLM Integration

Cloud, DevOps & Deployment: AWS, Docker, CI/CD, VPS & Cloud Deployment

Testing: Jest, Vitest

Mobile Development: React Native, Expo

Tools: Git, GitHub, Postman, Swagger, n8n, Jira, Linear, Notion, Cursor

PROJECTS

Learning Management System (LMS)

Full-Stack Engineer

Next.js | Express.js | MongoDB

[learnwithjewel.com](#)

Built and launched an end-to-end LMS from scratch (Learn With Jewel) with live-class streaming, assignment workflows, progress tracking, and online payment integration. Implementation of a secure custom video playback system with anti-distribution controls.

Ophelia Go – Multi-Vendor E-Commerce Platform

Lead Developer

Next.js | NestJS | PostgreSQL

[opheliago.com](#)

Architecture of a high-performance multi-vendor e-commerce platform with real-time inventory sync, vendor dashboards, dynamic product management, and a streamlined checkout workflow that reduced manual operations for administrators.

EDUCATION

International University of Business Agriculture and Technology (IUBAT)

Bachelor of Science in Computer Science & Engineering

2022 – 2026

Dhaka, Bangladesh

Gurudayal Government College

Higher Secondary Certificate (HSC) – Science | GPA: 5.00 / 5.00

2019 – 2021

Kishoreganj, Bangladesh
